

NOTES ON CAPE VERDE
FOR BRITISH NATIONALS

Welcome to Cape Verde!

I am the British Ambassador to these beautiful islands. However I, and my team, are resident in Dakar, Senegal, and cover all consular issues from there. We are supported on the islands themselves by an Honorary Consul, Antonio Canuto, and his assistant Isabel Spencer. They are based in Mindelo but can offer support in an emergency to people on any island in the archipelago. British citizens can also look for help to any of the resident European (French, Portuguese and Spanish) Embassies in Praia, the capital of Cape Verde. Contact details for all these possible sources of assistance can be found on page 28 of this booklet.

With the growing number of British citizens in Cape Verde we found that the number of consular enquiries we were getting was increasing dramatically. At the same time the number of non-emergency requests for information was having an impact on our ability to support genuine emergency cases. We therefore decided to produce this booklet which we hope you will find helpful as you embark on a long-term stay in these islands. If the information you require is not here please contact one of the Cape Verde Government agencies listed here, a Cape Verde Embassy or a lawyer from our list for up to date or more specifically tailored information. There are a number of British expats based in Sal who may also be able to assist you with general or up-to date advice. Contact details and other useful information can be found at www.expatscapeverde.com and www.capeverdetips.co.uk.

The types of emergency consular support the Embassy can give are listed at <http://www.fco.gov.uk/en/travel-and-living-abroad/how-we-can-help-faqs> and include prison visiting and helping those who have been a victim of a crime. If you need to travel urgently and your normal passport is not available, we may also be able to provide you with emergency travel documentation from our Embassy in Dakar. The issuing of a new full passport can take up to four weeks (sometimes longer if you are applying for the first time) and applications need to be made by post to the Regional Passport Processing Center in Pretoria, South Africa. More detailed guidance on the application process can be found by clicking on passports at <http://ukinsenegal.fco.gov.uk/en/> We recommend you consider using a visit to the UK to renew your passport. More detailed guidance on these issues can be found at <http://www.fco.gov.uk/en/travel-and-living-abroad/>

I hope you enjoy your stay in Cape Verde, however long you are planning to be here!

BRIEF PRESENTATION OF CAPE VERDE

History

The islands of Cape Verde were officially first discovered in 1460 (five of the islands), by Genoese António da Noli and Diogo Gomes of Portugal, both were explorers serving the Portuguese Crown. The other islands were discovered later in 1462 by Portuguese explorer Diogo Afonso. Colonization of the country commenced in the Seventeenth Century, Santiago was the first island to be colonized, with the establishment of a system of hereditary captaincies for African slave labour, brought over from the coast of Guinea to work in the plantations of sugar cane, cotton and fruit trees. From the second half of the Twentieth Century, with the emergence of the movements for the independence of the African peoples, a process of national liberation began in Cape Verde, led by the African Party for the Independence of Guinea and Cape Verde (PAIGC), which was secured on the 5th of July of 1975.

Geography

The archipelago of Cape Verde has a total area of 4. 033 square meters and is located 500 km off the west coast of Africa. It consists of ten islands and several islets of volcanic origin, nine of which are inhabited, divided into two groups: the Barlavento islands, or the northern island group comprised of Santo Antão, S. Vicente, Santa Luzia, São Nicolau, Sal and Boavista and the Sotavento islands, or the southern island group comprised of Maio, Santiago, Fogo and Brava.

Weather

The archipelago has a dry tropical climate with average annual temperatures rarely below 25°C. The water temperature varies between 21°C in February and 25°C in September. There are two seasons during the year, the dry season from December to June, and the rainy season from August to October.

Population

According to population projections by the National Institute of Statistics (INE), Cape Verde's population in 2009 was estimated at 508,633 inhabitants, and is expected to reach 567,633 inhabitants by 2015.

Economy

Cape Verde presents high rates of economic growth, with an estimated average/annual return per capita of about US\$ 2,000, due mainly to the political stability in the country as well as to the investments made in education, and the remittances from the immigrants.

The country's gross domestic product is produced mainly by the tertiary sector, resulting from the strong influence of tourism, which contributes above 70% to the GDP.

PURCHASE AND SALE OF PROPERTY

Purchase and sale of properties between private entities

Step 1

Before purchasing any property, the buyer should request a property registration certificate at the Property Registry Office, so as to check whether it is or is not registered in the Registry Office and if there are any burdens or charges levied on the property, including mortgages, seizures or arrests.

It is also recommended that the promissory buyer find information in the City Council on housing license availability (for urban property), on the location of the property (if it's land for construction) and on the tax value of the property.

Step 2

Once the property is reserved and the promissory contract of purchase and sale is celebrated, the next step should be the preparation of the public deed of purchase and sale, since real estate transactions are subject to Public Deed and registration in the Property Registry Office, which will be carried out by a Public Notary. The Public Deed of Purchase and Sale is subject to fees to be paid to the Public Notary, as set forth in decree-law no. 70/2009 of December 30, 2009, which are around 1.4% of the sale price of the property.

The following documents are required for the Public Deed:

- Identification Document (ID or Passport);
- Power of Attorney if the buyer is represented by an entity;
- Promissory Contract of Purchase and Sale;
- NIF (Taxpayer Identification Number);
- Property Registration Certificate.

Step 3

Once the Public Deed process is finished, payment of the Single Tax on Property (IUP) shall be made, at the rate of 3% of the value of the contract.

Note: In case of free transfers (grants), the IUP tax will fall on the value assigned to the property by the Fiscal Administration. This tax shall be paid by the buyer or recipient, whether resident or not in Cape Verde, within 30 (thirty) days after signing the public deed of purchase and sale, directly to the Municipal City Council where the property is located.

After the purchase, the property owner must make annual property tax payment to the municipal service, based on the value of the property assessed and registered in the City Council, at the time of payment. The tax rate of 3% (single tax) is levied on the value of the property being taxed (ad valorem tax), corresponding to 25% of the assessed value of the property by the Assessment Committee or the tax assessor determined by the Assessment Tax Regulation (which should be the value assessed and registered in the municipal property registry). This tax is due on December 31 of each year and payment must be made until April 30 of the following year.

Step 4

The last step of the process of purchasing property in Cape Verde is the registration of such purchase in the Property Registry Office. The process of registration will only be completed by the Property Registration Office after payment of the property tax (IUP) is made. The act of property registration requires the payment of fees and charges according the decree-law no.70/2009.

In order to register the property, the owner must submit the following:

- Formal request of the property registration;
- a document of identification (ID or Passport);
- Certificate of Public Deed of Purchase and Sale (issued by the Public Notary Office);
- Proof of payment of property tax (IUP) - Single Tax on Property;
- Taxpayer Identification Number (NIF).

Registration of land sold by the City Council

Step 1

The following documents will be required:

- Certificate of deed by the City Council;
- Certificate of property registration issued by the Municipal Property Registry Office;
- Location map of the property.
- Taxpayer Identification Number (NIF).

Step 2

Once the above documents are ready, the property must be registered in the Property Registration Office, as follows:

- Formal request of property registration in the name of the purchaser, including the following attachments: certificate of public deed, certificate of property registration by the municipal authorities, and property location map;
- ID or Passport of the purchaser.

CONTRACT FOR THE SUPPLY OF ELECTRICITY AND WATER

I – Simple Contract

For contracts for the supply of electricity or water on:

- A previously inhabited house;
- A commercial establishment or workshop;
- A place that has been previously supplied with electricity and water;
- A new site in which the power branch has already been installed.

The following documents are required:

- Photocopy of the client's ID or passport or of his/her lawfully designated attorney;
- Statement of inspection issued by the City Hall (certificate of habitability);
- Certificate of Property taxation payment issued by the Finances Department.

Contract Preparation

The contract is prepared once the following is confirmed:

- That the place of consumption has no active contract;
- That the client has no overdue payments in that place of consumption;
- That the client hasn't just the last invoice in his/her name (referring to the last month) in debt, in another place of consumption;
- That there is a water and power meter as well as connecting devices available for immediate instalment.

The contract is concluded upon the issuance, in duplicate, of an invoice / receipt signed by both parties and paid on the signing act, and one copy shall belong to the customer and the other copy to the company. The general conditions of contract shall be attached to the customer's copy.

Contract Costs

At the act of signature of the power supply contract the customer shall pay connecting fees of 169 CVE for the instalment of monophase plugs and 360 CVE for triphase plugs. At the time of signing water supply contract, the customer shall pay a connecting fee of 846 CVE. In case of an amendment to contract for electricity supply related to changing the place of consumption, the customer pays the amount of 169 CVE.

II - Special Contracts

Special contracts can be created between parties in order to meet specific and temporary situations. They are categorised as temporary in nature, if they do not include water and power meter devices, and if they are not for consumption in places undergoing construction. This condition shall be proved through a valid "construction permit", issued by the municipal authorities.

Documents required:

- Photocopy of the client's ID or passport or of his/her attorney, and in this case a copy of the proxy;
- Copy of construction permit issued by the City Council;
- Inspection: A technical team shall conduct an inspection at the place of consumption aimed at:
 - Verification of technical and safety conditions for power supply and for proper conservation of the power meter device, as well as the access conditions available to the company's agents.
 - Verification of the possibility of implementing the final extension for power supply, according to the respective project, if the client intends to save the cost of the temporary extension of the plant. If this is not possible, the temporary extension will

- be budgeted and charged with the contract for the plant, which will then be replaced by the final extension, to be requested and paid by the client.
- Definition of the gauge of the limiting circuit breaker to be installed, as well as the guarantee to be paid by customers of domestic LT (Low Tension).

Contract Preparation

The contract is sealed once it is confirmed that the client has no overdue payments with the power company Electra in any place of consumption. The contract is valid for the same period the construction permit is valid, and it may be renewed once the construction permit is renewed. Once the contract expires and there is no renewal, it will automatically be terminated.

III - Temporary Connection (power)

This type of connection is temporary, used in sporadic events such as rallies, parties, shows or other events that shall not exceed 3 days, subject to the following conditions:

- Direct connection without power meter device;
- Power supply: monophase or triphase power static supply in LT;
- Released intensity: 15 amperes / phase controlled by appropriate circuit breaker.

Temporary power supply connections are made through a special contract and payment of fees related to connection and power supply.

REPORTING A CRIME

Crime reporting shall be made in the closest police station, through submission of identification (passport or identification card) by the complainant. It can also be made without any identification document, but the accuser's identity must be confirmed later on.
